Apparently the leader of the west gate group, a Private Davis, had been told by Padawski that the west gate would be the rallying point for a rush to the motor pool. Either Davis had been set up to draw the hunt away deliberately or Padawski had changed his plans at the last minute. Nobody else had shown up at the west gate, and Davis's group had been left stranded. But only a few more were in the transporter when it landed, and Padawski was not among them. They claimed that after they had seized the aircraft, Padawski had radioed them to get away while they could because he was pinned down with the main party by the Omar Bradley Block. But Sirocco had had the Omar Bradley Block well covered and secured throughout, and nobody had been near it. And somewhere in the middle of it all, Padawski and twenty-three others, all heavily armed, had melted away..Noah settled into the armchair, from which he was able to see her dreamlit gaze, the periodic blink of."Do you figure they might start trouble, chief?" Hence the question probably concerned him more than anybody else. Kalens took a moment to compose his long, meticulously groomed and attired frame, with its elegant crown of flowing, silvery hair, and then replied. "I agree with John that a rigid rule needs to be asserted early on . . . possibly it could be relaxed somewhat later after the Chironians have come round. However, Mark has a point too. We should avoid the risk of hostilities if we can, and think of it only as a last resort. We're going to need those resources working for us, not against. And they're still very thin. "Why do a lot of cops from back then like ZZ Top?" he wondered..Bernard looked from Kath, to Colman, to Jay, and then back to Colman. He was beaten, and he knew it. But after Kath's cryptic statement, he wasn't inclined to argue too much. "Hell, it's not so bad. He doesn't need anyone to stop him from getting shot," he replied. Beside him, Jay's face dropped. Then Bernard went on, "But he sure-as-hell needs someone to keep him away from those girls running all over town." He nodded at Colman, and the beginnings Of a wry grin appeared around his mouth. "Keep a good eye on him, Steve. He's crafty." He turned his head and stared resignedly at his son. "And you," he grunted. "Get home on time, and don't say anything about this to your mother." Colman turned his head and called in a louder voice, "Stanislau, Young-come over here and give me a hand with this crate." Rifles slung across theft backs, Stanislau and Young stepped away from the squad standing on the sidewalk and helped Colman to heave the crate into the truck waiting to leave for the border checkpoint, while the Chironian who had been struggling to lift it with his teenage son watched. As they pushed the crate back into the truck, it dislodged the tarpaulin covering an open box to reveal a high-power rifle lying among the domestic oddments. The Chironian saw it and lifted his head to look at Colman curiously. Colman threw the tarp back over the box and tuned away..Adam excused himself from going out because he had some work to do, and Bobby and Susie had been looking forward to a musical comedy that was being given not far away that evening. Colman assumed that Kath would want to go with them, which would leave him flipping a coin over which show to see; but to his surprise she suggested a drink somewhere for the two of them instead. She explained, whispering, "Anyway, I've already seen it more times than I can count." So who was he to turn it down? Colman asked himself. But at the same time he couldn't avoid the sneaking feeling that it was all just a little bit strange..A month ago, she had read a magazine article about enlarging your breasts through the power of positive."You really wanna know?" An intense note had come suddenly into Driscoll's voice..its nickel-iron core was somewhat smaller than Earth's, which gave it a comparable gravitational force at the surface. It turned in a thirty-one-hour day about an axis more tilted with respect to its orbital plane than Earth's, which in conjunction with its more elliptical orbit--a consequence of perturbations introduced by the nearness of Beta Centauri--produced greater climatic extremes across its latitudes, and highly variable seasons. The numbers of killed and wounded predicted for an intended operation were presented by his analysts a- the "Loss Factor" and the "Combat Reduction Factor," respectively; a city selected to be incinerated along with its inhabitants was "nominated"; an area drenched with napalm and saturated with high explosive was subjected to "exploratory aggressive reconnaissance"; and a village flattened as a warning against harboring insurgents became an object of a "protective reaction."
